Global Patient Monitoring Devices Market Report Description:

The global patient monitoring devices market was valued at USD 53.4 billion in 2025 and is expected to reach USD 118.5 billion by 2033, growing at a CAGR of 10.8% during the forecast period. Patient monitoring devices are critical tools in modern healthcare, enabling continuous or periodic assessment of vital signs and health parameters for patients in hospital, home, or ambulatory settings. These devices play a pivotal role in the diagnosis, prevention, and management of chronic diseases, post-operative care, and acute conditions.
